TECHNICAL & BUSINESS PROJECTS

Meridian Health Records

[Live Site](#)

Developer

- Meridian is a modern, secure patient information system built for clinics and care teams who need more than a spreadsheet and less risk than a legacy system. Every patient record, procedure, and visit is protected by role-based access control, full audit logging, and encrypted sessions — with a fast, intuitive interface available in English, Spanish, and French for teams working anywhere. Built on Spring Boot and React with an enterprise-grade security foundation, Meridian scales from a single clinic to a growing care network, and deploys however you need it — self-hosted, or fully serverless on Vercel.

Crypto Market Watch using the CoinGecko API

[Live Site](#)

Developer

- Built a web application that integrates CoinGecko API data to display cryptocurrency market information and price charts.

Numeron Web Game

[Live Site](#)

Developer

- Developed an interactive browser game featuring player growth, collision-based progression, and game-over logic based on relative orb size.

Revival Cafe Business Simulation

Feb 2024 - May 2024

Project Team Member | Legal Environment of Business (BUSN 323)

- Co-developed a virtual cafe concept, contributing to research and development and financial management.
- Analyzed cafe industry trends and proposed customer-acquisition and profitability strategies.
